

What is claimed is:

- 1 1. A chain guide (60) comprising:
2 a plurality of sections (62, 64, 66) with each section conjoined together via a link (68);
3 each of the plurality of sections (62, 64, 66) having a partial upper side (12i) which forms,
4 in part, an upper side, all of the partial upper side (12i) of the plurality of sections (62, 64,
5 66) together form the upper side of the chain guide.
- 1 2. The chain guide of claim 1, further comprising a link disposed to link two adjacent
2 sections of the plurality of sections (62, 64, 66) together.
- 1 3. The chain guide of claim 2, wherein the link comprises a pin (69) disposed to pass
2 through annular openings of adjacent sections.
- 1 4. The tensioner arm of claim 3, wherein the link comprises an elastic member (80)
2 associated with the pin (69) to maintain shape and compliance with use.
- 1 5. The chain guide of claim 1, wherein the plurality of sections (62, 64, 66) consists of a
2 first end section (62).
- 1 6. The chain guide of claim 1, wherein the plurality of sections (62, 64, 66) consists of a
2 second end section (64).
